

Design Brief — Brand Identity, Websites & Brochures

Client: Rehan Momin **Entities:** Imperial Solution Company (KSA) and STG Industrial Services & Trading W.L.L. (Qatar) **Purpose:** Scope definition for quotation

1. Company A — Imperial Solution Company (ISC)

Legal name	Imperial Solution Company
Location	Dammam, Eastern Province, Kingdom of Saudi Arabia
Status	MISA-licensed foreign investment entity (100% foreign ownership)
Domain	isc-ksa.com (live, with active email)
Contact	Farhan Momin, General Manager

Business verticals

1. **Industrial supply & trading** — exotic-alloy and stainless fasteners (Hastelloy C276, SS 316/304), flanges, flanged spacer spools, pipes and tubes, pneumatic tubing and fittings (Parker Legris, Camozzi), dry-disconnect couplings, general MRO and project supply.
2. **ISC–CMT Joint Venture** — manufacturing of GRC / GRP and construction materials. Factory of approx. 2,178 sqm under lease in Dammam. Capital SAR 1.2M, 50:50 structure.
3. **Exclusive distribution** — Master Coating product range for KSA (agreement with The North Force Company LLC).
4. **Planned** — tube and pipe manufacturing unit in Dammam (seamless SS/MS pilger processing, EFW/ERW welded pipe).

Target customers

Oil & gas operators and contractors, petrochemical plants, EPC and construction contractors, government and Vision 2030 infrastructure projects, industrial distributors.

Positioning

A young, ambitious, locally-registered Saudi entity with Indian manufacturing and sourcing depth behind it. Should read as credible enough to sit on an Aramco-tier vendor list — not as a trading desk.

Existing material

- Bilingual (English / Arabic) business cards already designed
 - Trademark strategy underway with SAIP
 - Product technical drawings, BOQs and datasheets available
 - Existing logo — to be reviewed for refinement or full redesign
-

2. Company B — STG Industrial Services & Trading W.L.L.

Legal name	STG Industrial Services & Trading W.L.L.
Location	Birkat Al Awamer, Qatar
Domain	stg-qatar.com (live, with active email)

Services

1. **Pump and motor repair & overhaul** — workshop-based rebuilds, reconditioning, testing.
2. **Mechanical seals** — supply, replacement, refurbishment.
3. **HERMETIC-Pumpen GmbH (Germany)** — authorized partner for canned-motor and hermetically sealed pumps. This partnership is a primary trust signal and must be visible on the website homepage and brochure cover area.
4. **Fabrication & engineering** — stainless steel tanks (e.g. 2,500 mm SS 304 open-top tanks with SHS base frames), pipe spools for pump suction and discharge lines, structural steel work.
5. **Industrial supply & trading** — spares, consumables, mechanical items.

Target customers

Qatari oil & gas and petrochemical operators, water and utilities authorities, EPC

contractors, industrial plants and facility maintenance departments.

Positioning

An established hands-on engineering services company. Workshop capability and the German OEM partnership are the differentiators. Tone: technical, reliable, no fluff.

Existing material

- Company brochure recently redesigned — GCC oil & gas aesthetic, petroleum green and gold palette, bilingual English/Arabic, HERMETIC partnership highlighted. **This is the reference direction.**
 - Engineering drawings, tank and spool designs, workshop photographs
-

3. Scope of work requested

A. Brand identity (each company, separately)

- Logo design or refinement — primary, secondary and monochrome versions
- Arabic logotype / wordmark to sit alongside the Latin mark
- Colour palette with print (CMYK / Pantone) and digital (HEX / RGB) values
- Typography system — Latin + Arabic pairing that works together
- Brand guidelines document (PDF)
- Stationery: letterhead, business card, envelope, email signature
- Business templates: quotation, invoice, purchase order, PowerPoint deck
- Optional: workshop signage, vehicle branding, uniform/PPE branding, exhibition backdrop

B. Websites (two separate sites)

- isc-ksa.com and stg-qatar.com
- Bilingual English + Arabic with proper RTL layout (not machine-translated)
- Mobile-first, fast-loading
- Indicative structure: Home / About / Products or Services (with sub-pages per vertical) / Partners & Certifications / Projects or Case Studies / Downloads (catalogue, datasheets)

/ Contact with enquiry form + WhatsApp

- CMS so we can update content in-house
- Basic on-page SEO and Google Business Profile setup
- SSL, analytics, contact form routing to company email

Technical note for the developer: both domains already have live email on Microsoft 365. DNS must be changed carefully — MX, SPF, DKIM and autodiscover records must not be disturbed when pointing the domain to new hosting.

C. Brochures (two, one per company)

- Corporate brochure, English and Arabic versions
 - Print-ready CMYK PDF with bleed + compressed digital PDF for WhatsApp/email
 - Editable source files handed over
 - Product / capability datasheets as a separate templated series
-

4. Information required from you for the quotation

Please price the package with these broken out separately so we can phase the work:

1. Brand identity — per company
2. Website design + development — per company
3. Brochure design — per company (state assumed page count)
4. Datasheet template series
5. Annual website maintenance / hosting, if offered

Also confirm:

- **Timeline** for each phase and total
- **Number of revision rounds** included at each stage
- **Who writes the copy** — English and Arabic. If you are providing Arabic copywriting, confirm it is by a native writer, not translated software output.
- **Photography** — do you require a shoot at our Dammam and Qatar premises, or will you work from supplied photos and stock?

- **Source files and IP** — all editable source files (AI, PSD, Figma, code) and full ownership to be transferred to us on final payment
 - **Payment terms and milestone structure**
-

5. Notes

- Both companies serve the same GCC industrial market. They should look like credible siblings without being identical — a shared design discipline, distinct identities.
- All Arabic work must be reviewed by a native Arabic speaker before delivery. Incorrect Arabic typography or letterform connection is immediately visible to our customers.
- Please share portfolio samples of previous **industrial, oil & gas or B2B manufacturing** work specifically, and any bilingual Arabic websites you have delivered.
